FINVENT
SOFTWARE SOLUTIONS

Job Description:

Back Office Consultant, Investment Management Software

Brief Description

To meet the increasing demand around Europe and MENA for our front- to back asset management solutions and to increase our focus in this region, Finvent International is seeking numerous Back Office Consultants, Investment Management Software, to be based in our Athens office in Greece.

Description

The Finvent Group of Companies (Finvent SA, Finvent International Ltd and JPI Ltd), since 2001 is the exclusive distributor of SS&C Advent Software solutions and a key-certified Advent Software outsourced partner. We provide best-of-breed applications and professional services to all types of asset management firms, bank private & wealth management divisions, mutual funds and hedge funds, fund administrators and family offices, organizations based in South Eastern Europe, Italy, Malta, Iberia, Middle-East and Africa.

Via our Finvent International company we provide experienced and certified professional to accommodate both Advent EMEA and Finvent client services-needs for the past ten years.

As Back Office Consultant, Investment Management Software you will work closely with our clients (asset managers, fund managers, hedge funds, wealth managers and private banks) to implement and maintain our solutions in their back- and front-office environments.

Typical tasks are: workflow analysis, understanding the clients' business, configuration, data conversion, specification of custom deliverables, system testing, user training and client communication. Consultants would also evaluate and recommend enhancements to existing clients' installations and processes.

The Consultant will be servicing clients primarily in the Northern Europe region and will also be allocated to projects elsewhere in Europe and Middle East. The role is therefore ideal for candidates who are flexible in terms of travelling and find it exciting to explore different cities, cultures and business practices.

Qualifications Requirements

• Strong IT/technical skills (MS Windows, MS SQL, MS IIS, integration tools, reporting tools, scheduling, networks and databases), exposure to Unix or Linux environments, with several years of on-the-field experience.

• Relevant work experience (4+ years) in asset management or financial software or investment management consulting.

• Good business knowledge of Fund Accounting and of the Investment Management Industry.

• Good Understanding & strong experience of financial instruments (stocks, bonds, funds, derivatives). • Strong problem solving & trouble shooting skills.

• Strong problem solving & trouble shooting skills.

A positive client, team and solution-oriented attitude.

• Experience with portfolio management systems is a great plus.

• University-level degree.

• Excellent communication skills in English is required. Greek is also desired. Communication skills in additional European languages are highly appreciated.
