

BUSINESS CONSULTANT

Finvent Software Solutions, where highly skilled professionals power the market in automated solutions for investment professionals, is currently seeking a highly motivated **Implementation Consultant** at our office in Athens.

Finvent's quality software, data, services and tools enable financial professionals to improve service and communication to their clients, allowing them to grow their business while controlling costs.

Finvent is the only Advent Software distributor-partner worldwide and offers an extended set of own-solutions to the Investment management industry around the globe.

DESCRIPTION

As Implementation Consultant, you will work closely with our clients (asset managers, fund managers, hedge funds, wealth managers and private banks) to implement and maintain our solutions in their back- to front-office environments.

Typical implementation tasks are: installation, configuration, integration, data conversion, automation of processes, specification of custom deliverables, system testing, user training and client communication. Consultants would also evaluate and recommend enhancements to existing clients' installations and processes.

The Consultant will be servicing clients primarily in Europe and the Middle East. The role is therefore ideal for candidates who are flexible in terms of traveling and find it exciting to explore different cities, cultures and business practices.

Our products run on an MS Windows / MS SQL platform and spans the functions of: Portfolio Management, Risk Management, Client & Management Reporting, Performance Analytics, Client Relationship Management and Trading & Order Management.

For more information see <https://finvent.com/solution/>

Qualifications

- Demonstrated good business knowledge of the investment management industry.
- Relevant work experience (consulting, asset management or financial software).
- Strong IT/technical skills (MS Windows, MS SQL, MS IIS, integration tools, reporting tools, scheduling, networks and databases).
- A positive client, team and solution-oriented attitude
- Strong problem solving & troubleshooting skills
- Understanding & strong experience of financial instruments (stocks, bonds, funds, derivatives).
- Experience with portfolio management systems is a great plus.
- Related University-level degree, related Master's level preferred.
- Excellent or fluent communication skills in English. Greek and other languages are highly desirable.
