FINVENT
SOFTWARE SOLUTIONS

Software Developer & Engineering Consultant

Finvent, since 2001, is a successful regional provider of award-winning software and services provider to the investment management industry. We are also the exclusive regional distributor and professional services partner of SS&C Advent Software.
Our clients span across 15+ countries include asset managers, wealth managers, banks, family offices, fund managers, fund administrators and prime brokers.
Our solutions streamline their daily processes for portfolio management, trading and order management, risk management & compliance, portfolio accounting, performance analytics, client & statutory reporting and more.

Description

We are seeking several talented and service-minded persons to join our team as Software Developers & Engineering Consultants, Investment Management Software Unit.

In this role, you will help our clients across Europe, Middle East, Africa and Asia Pacific optimize business workflows, by creating, delivering and supporting any customizations they need to bridge our technology with their unique requirements. You will collaborate closely with the client to gather requirements and provide detailed specifications, to ensure delivery meets their expectations. This work includes consulting, analysis, development and quality assurance.

Finvent provides training, covering the securities industry, database and networking technologies as well as our portfolio management and reporting products, including tools used for creating customizations. Once settled in you will work closely with our clients and the entire team at Finvent and possible with one of our partners, across business functions and regions. The work is rewarding, yet presents new challenges every day. It requires fast pace and ability to adapt to challenges and priorities as needed.

This is a unique opportunity to blend financial industry knowledge with technology skills, in a vibrant, international work environment. You get to tap into the knowledge of leading financial institutions as well as our experienced team, to learn and develop skills that will ultimately help you progress your career, and grow a solid network within the fin-tech industry.

Responsibilities

- Provide custom engineering services for clients across EMEA and APAC regions, covering modification and development of software specified by the services organization.
- Assist Finvent's services organization by sharing knowledge of software development skill sets and providing consultancy.
- Create technical documentation for custom engineering items.
- Support items already developed and delivered.
- Train and learn on product changes and new technologies relevant to building custom engineering items.
- Manage and utilize outsourcing resources.
- Manage custom solution project deliverables in implementation projects.

FINVENT
