FINVENT
SOFTWARE SOLUTIONS

Software Developer & Custom Engineering Consultant

Finvent, since 2001, a successful regional provider of award-winning software and services for the investment management industry and the exclusive distributor and professional services partner of SS&C Advent Software.

Our clients span across 15+ countries and include asset managers, wealth managers, Pension Funds, hedge funds, family offices, fund managers, and fund administrators. Our solutions streamline their processes for portfolio management, trading and order management, risk management & compliance, portfolio accounting, fund distribution, remote client services, performance analytics, reporting and more.

Description

We are seeking a talented and service-minded person to join our team as a Software Develop & Custom Engineering Consultant, Investment & Risk Management Software Unit.

In this role, you will help our clients across Europe, Middle East and Africa by implementing and advising on technology solutions to streamline their processes, for increased efficiencies and reduced operational risk.

This is a unique opportunity to blend strong development expertise with financial industry knowledge & skills, in a vibrant, international work environment. You get to tap into the knowledge of leading financial institutions as well as our experienced team, to learn and develop skills that will ultimately help you progress your career, and grow a solid network within the fintech industry.

Responsibilities

- Design, develop, and test software along with the rest of the agile team while ensuring stakeholders remain satisfied with the results.
- Ensure that the team remains laser focused on delivering value to the market and not just code.
- You're expected to be curious about new technology and driven to develop the best possible solution with the tools available.
- Provide custom engineering services for clients across EMEA and APAC regions, covering modification and development of software specified by the services organization.
- Create technical documentation for custom engineering items.
- Manage project deliverables of custom solutions, for quality and on-time completion in implementation projects.

Qualifications & Skills

- ➢ Several years' .NET experience and C# developing.
- ➢ Good SQL server skills (T-SQL, ADO .NET, database tools, etc.) with a drive to optimize and automate
- ➢ Experience with SQL Server Reporting Services is a plus.
- ➢ Relevant University Degree Education in computer science or other relevant technical degree
- ➢ Highly positive if knowledgeable with JavaScript/UI frameworks and full-stack development skills.

- ➢ Familiarity with agile development methodologies and familiar with test driven development.
- ➢ Very good communication skills in English and Greek is required. Communication skills in additional European languages skills are very desirable.
- ➢ A Holder of a European passport or EU Working Visa is required
- ➢ Knowledge of the financial industry and fintech is a plus but not required

Benefits

On top of challenging work and a competitive salary, we are offering:

- Competitive salary and bonus payment plans
- Private health & medical insurance plan
- International product certification and continuous training programs
- International travel and global professional experience as well as working flexibility
- Become part of a mission-driven team which constantly learns and improves
- Be part of a socially responsible entity and with a group of like-minded people

Your race, age, ethnicity or disability, gender identity and expression make no difference to Finvent. We want to attract, develop, promote and retain the best people based only on their abilities and professional behavior.
